

Grafham Grange School

Repairs to bring the architecture back to its former glory

SECTOR

Heritage; Education

LOCATION

Guildford, Surrey

SERVICES

Architecture; Building
surveying; Project
management

01 Project Goal

To provide consultancy, design, and project management for damage repair

02 Solution

Grafham Grange was built by Henry Woodyer, Victorian Architect, in 1854 as a vicarage for £1,500. The building is now grade II listed owing to its special architectural and historical interest, including original features such as gothic design features, a fine staircase, panelled ceilings of oak with some oak floors and a number of stone and wooden fireplaces. Set in 42 acres of Surrey countryside Grafham Grange now serves as a special needs school for up to 52 boys.

The school had a major leak causing substantial damage to the original decorative ceiling and woodwork. Following our appointment DHP project managed the work, liaised with loss adjusters, arranged tenders, acted as Principal Designer under the CDM regulations and monitored works. The original features have been restored to their former beauty.

Creating *beautiful* buildings.
